SELECTED PROJECTS

Akyrian
(August 25, 2021 - May 25, 2023)
Web Application

clinical research application which manages the flow of R&D being used by doctors and nurses to study patients using robust data entry and chains of authorized review.

- I help with expanding the database based on new requirements (BE)
- reducing load time by refactoring previous css styling implementation (FE)
- refactoring slow components by making more efficient states that utilizing memoization and avoiding previous versions slow down caused by unnecessary rendering. (FE)
- I help created the entire apps Audit Log system.
